***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-22, drawn to a process for preparing an aligning substrate for liquid crystals.

Group II, claim(s) 23-50, drawn to a method for generating an alignment direction on an aligning substrate for liquid crystal cells.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical features recited in independent claim 1 are known, as evidenced by the JP 07056172 cited by Applicant. Thus, there are no common special technical features between the independent claim of Group I and the independent claims of Group II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement,

Art Unit: 2871

the election shall be treated as an election without traverse.

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.
